

What is a Kialo

Kialo is an easy to use, yet powerful tool to help you understand different points of view, and make decisions.
We show you how

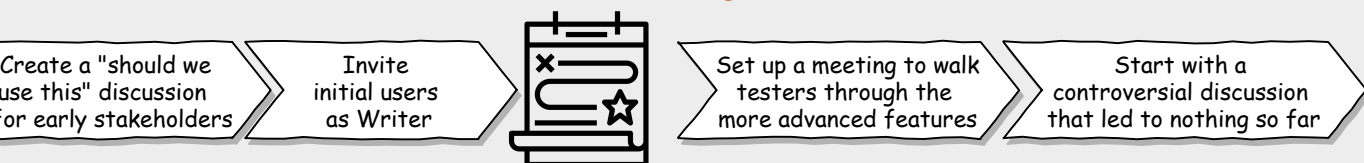

Owner

There can only be one owner.
An owner has the ability to delete a discussion.

Kialo discussion?

tool to engage in thoughtful discussion,
and help with collaborative decision-making.
Here how it works.

How to start Kialo in an organization?

Only be one owner of a discussion.
Has full processing rights.

There can be multiple admins in a discussion.
They can do anything except changing the owner.

Admin

How can you shape a Kialo discussion?

One thesis or many?

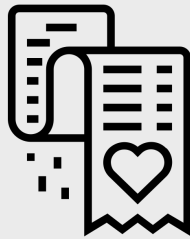

Public or closed group?

What can you do if you like a claim?

You can thank the author for his contribution by clicking the ♥

You can rate the claim's impact with a high value (if voting is enabled)

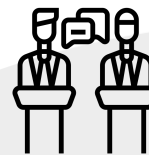

Viewer

Has limited rights but can vote. Viewers can suggest claims and comments, which must be approved by admins.

Has the right to write claims, as well as participate in discussion. The discussion is part of the claim.

Writer

How to write a good claim?

Make one point at a time.

Keep claims directly relevant to their parent.

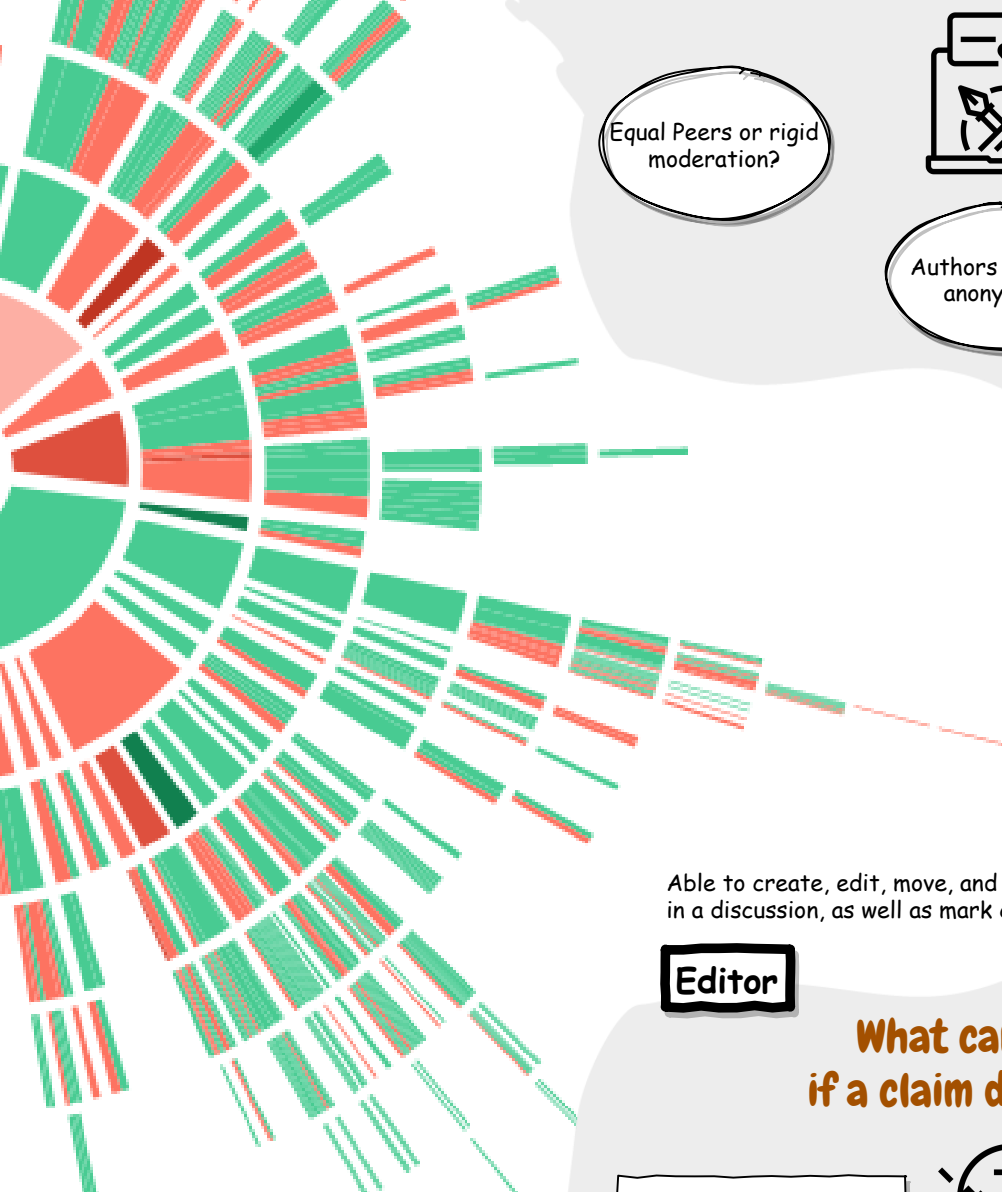

Keep claims short, simple and to the point.

Use research evidence and facts to support your claims.

Use logic to support your claims.

Establish a consistent style of writing

Define acronyms for each claim when you use them.

Equal Peers or rigid moderation?

Open voting, secret voting, or no voting?

Authors visible or anonymous?

right to create, move, edit or delete own
ell as link claims in other locations in the
Writers can comment on any claims in
sion, and message the discussion chat.

Editor

What can you do if a claim does not fit?

Viewers can suggest comments or changes

Writers can comment and refer to others with "@other_user_name"

Editors can Mark for review

- Unsupported
- Not a claim
- Unclear
- Vulgar/abusive
- Duplicate claim
- Unrelated
- More than one claim
- Move elsewhere
